SUMMARY

MCA graduate and Full-Stack Developer with hands-on experience building responsive web applications using JavaScript, React.js, Node.js, Express.js, HTML5, CSS3, Bootstrap, REST APIs, and Git. Experienced in developing frontend interfaces, reusable components, CRUD functionality, API integration, and backend services with database connectivity. Built and deployed full-stack projects including an Order Management System and other React-based applications. Strong foundation in OOP, DSA, DBMS, SQL, JSON, and API development, with a keen interest in building scalable, maintainable, and user-friendly web applications.

TECHNICAL SKILLS

- **Programming:** C++, JavaScript (ES6+), HTML5, CSS3.
- **Frontend:** React.js, Bootstrap, React Router, Axios, Responsive Web Design.
- **Backend:** Node.js, Express.js, REST APIs, CRUD Operations, Authentication, File Upload.
- **Database:** SQL fundamentals, DBMS concepts, MongoDB.
- **Tools & Deployment:** Git, GitHub, Vite, npm, Netlify, Vercel, Render.
- **Other:** API Integration, Debugging, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA).

PROJECTS

Order Management System | Full Stack | [Demo](#)

2025

Technologies: React.js, Node.js, Express.js, REST API, JavaScript.

- Developed a full-stack Order Management Application using React.js, Node.js, and Express.js.
- Designed and integrated RESTful APIs for order creation, retrieval, management, and invoice file access.
- Implemented CRUD operations and handled client-server communication using Axios.
- Integrated Appwrite Database, Storage, and messaging services for data and file management.
- Deployed the frontend and backend independently and configured the environment-based settings.
- Used Git and GitHub for version control, source-code management, and project development.

Selector | React Application | [Demo](#)

2024

Technologies: React.js, JavaScript, Bootstrap, Appwrite (Baas).

- Developed a React-based web application for creating and managing lists.
- Implemented CRUD functionality using Appwrite backend services for data management.
- Integrated Google Sign-In authentication for secure user access.
- Built reusable React components and managed application state for interactive functionality.
- Integrated frontend components with Appwrite database and storage services.
- Designed responsive user interfaces using Bootstrap for consistent usability across devices..

Ingredients Management System | Full Stack | [Demo](#)

2025

Technologies: React.js, Node.js, Express.js, REST API, MongoDB, Axios.

- Developed a full-stack Ingredient Management Application for managing ingredient-related data.
- Built RESTful APIs using Node.js and Express.js for ingredient data management.
- Integrated MongoDB for storing, and retrieving ingredient information.
- Integrated frontend components with backend APIs using Axios for seamless client-server communication.
- Implemented form handling, CRUD operations, pagination, search, filtering, and API communication.

EDUCATION

Master of Computer Applications

Dec 2021 - Dec 2023

Lovely Professional University

Bachelor of Arts in English

July 2017 - Dec 2020

University of Delhi

CERTIFICATION/ TRAINING

C++ Programming Language - Coding Ninja

Sep 2021

(Learnt the basics of C++, Object Oriented Programming, Data Structures and Algorithms).

Full Stack Development - Board Infinity

May 2023

(Completed hands-on training in Full Stack Development, covering HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, databases, REST APIs, and Git/GitHub.).
